Delta Dental PPO Limitations and Exclusions

Limitations

- (1) Services that are more expensive than the form of treatment customarily provided under accepted dental practice standards are called "Optional Services." Optional Services also include the use of specialized techniques instead of standard procedures.

Examples of Optional Services:

- a) a composite restoration instead of an amalgam restoration on posterior teeth (for Bronze and Voluntary dental PPO plans only);
- b) a crown where a filling would restore the tooth;
- c) an inlay/onlay instead of an amalgam restoration;
- d) porcelain, resin or similar materials for crowns placed on a maxillary second or third molar, or on any mandibular molar (an allowance will be made for a porcelain fused to high noble metal crown); or
- e) an overdenture instead of denture.

If an Enrollee receives Optional Services, an alternate Benefit will be allowed, which means Delta Dental will base Benefits on the lower cost of the customary service or standard practice instead of on the higher cost of the Optional Service. The Enrollee will be responsible for the difference between the higher cost of the Optional Service and the lower cost of the customary service or standard procedure.

(2) Exam and cleaning limitations:

- a) Delta Dental will pay for oral examinations and cleanings (including scaling in the presence of generalized moderate or severe gingival inflammation-full mouth, periodontal maintenance in the presence of inflamed gums or any combination thereof) no more than twice in a Calendar Year.
- b) A full mouth debridement is allowed once in a lifetime when the Enrollee has no history of prophylaxis, scaling and root planing, periodontal surgery or periodontal maintenance procedures within three (3) years. When allowed a full mouth debridement counts toward the maintenance frequency in the year provided.
- c) Note that periodontal maintenance and Procedure Codes that include periodontal maintenance and full mouth debridement are covered as a Basic Benefit and that routine cleanings (including scaling in presence of generalized moderate or severe gingival inflammation-full mouth) are covered as a Diagnostic and Preventive Benefit. See note on additional Benefits during pregnancy.
- d) Caries risk assessments are allowed once in 36 months.

(3) X-ray limitations:

- a) Delta Dental will limit the total reimbursable amount to the Provider's Accepted Fee for a complete intraoral series when the fees for any combination of intraoral x-rays in a single treatment series meet or exceed the Accepted Fee for a complete intraoral series.
- b) When a panoramic film is submitted with supplemental film(s), Delta Dental will limit the total reimbursable amount to the Provider's Accepted Fee for a complete intraoral series.

- c) If a panoramic film is taken in conjunction with an intraoral complete series, Delta Dental considers the panoramic film to be included in the complete series.
 - d) A complete intraoral series and panoramic film are each limited to once every 60 months.
 - e) Bitewing x-rays are limited to two (2) times in a Calendar Year when provided to Enrollees under age 18 and one (1) time each Calendar Year for Enrollees age 18 and over. Bitewings of any type are disallowed within 12 months of a full mouth series unless warranted by special circumstances.
- (4) Topical application of fluoride solutions is limited to twice in a Calendar Year.
 - (5) Space maintainer limitations:
 - a) Space maintainers are limited to the initial appliance and are a Benefit for an Enrollee to age 14. However, a distal shoe space maintainer-fixed-unilateral is limited to children age eight (8) and younger. A separate/additional space maintainer can be allowed after the removal of a unilateral distal shoe.
 - b) Recementation of space maintainer is limited to once per lifetime.
 - c) The removal of a fixed space maintainer is considered to be included in the fee for the space maintainer; however, an exception is made if the removal is performed by a different Provider/Provider's office.
 - (6) Pulp vitality tests are allowed once per day when definitive treatment is not performed.
 - (7) Oral/facial photographic images and diagnostic casts are covered once per lifetime in conjunction with Orthodontic Services only when Orthodontic Services are a covered benefit. If Orthodontic Services are covered, see Limitations as age limits may apply. However, 3D x-rays are not a covered benefit.
 - (8) Sealants are limited as follows:
 - a) to permanent first molars through age eight (8) and to permanent second molars through age 15 if they are without caries (decay) or restorations on the occlusal surface.
 - b) repair or replacement of a Sealant on any tooth within 24 months of its application is included in the fee for the original placement.
 - (9) Specialist Consultations, screenings of patients and assessments of patients are limited to once per lifetime per Provider and count toward the oral exam frequency.
 - (10) Delta Dental will not cover replacement of an amalgam or resin-based composite restorations (fillings) or prefabricated crowns within 24 months of treatment if the service is provided by the same Provider/Provider office. Replacement restorations within 24 months are included in the fee for the original restoration.
 - (11) Protective restorations (sedative fillings) are allowed once per tooth per lifetime when definitive treatment is not performed on the same date of service.
 - (12) Prefabricated crowns are allowed on baby (deciduous) teeth up to age 16. Replacement restorations within 24 months are included in the fee for the original restoration.
 - (13) Therapeutic pulpotomy is limited to once per lifetime for baby (deciduous) teeth only and is considered palliative treatment for permanent teeth.

- (16) Retreatment of apical surgery by the same Provider/Provider office within 24 months is considered part of the original procedure.
- (17) Palliative treatment is covered per visit, not per tooth, and the fee includes all treatment provided other than required x-rays or select Diagnostic procedures.
- (18) Periodontal limitations:
 - a) Benefits for periodontal scaling and root planing in the same quadrant are limited to once in every 24-month period. See note on additional Benefits during pregnancy. No more than two quadrants of scaling and root planing will be covered on the same date of service.
 - b) Periodontal surgery in the same quadrant is limited to once in every 36-month period and includes any surgical re-entry or scaling and root planing performed within 36-months by the same Provider/Provider office.
 - c) Periodontal services, including bone replacement grafts, guided tissue regeneration, graft procedures and biological materials to aid in soft and osseous tissue regeneration are only covered for the treatment of natural teeth and are not covered when submitted in conjunction with extractions, periradicular surgery, ridge augmentation or implants. Guided tissue regenerations and/or bone grafts are not benefited in conjunction with soft tissue grafts in the same surgical area.
 - d) Periodontal surgery is subject to a 30 day wait following periodontal scaling and root planing in the same quadrant
 - e) Cleanings (regular and periodontal) and full mouth debridement are subject to a 30 day wait following periodontal scaling and root planing if performed by the same Provider office.
 - f) When implant procedures are a covered benefit, scaling and debridement in the presence of inflammation or mucositis of a single implant, including cleaning of the implant surfaces, without flap entry and closure is covered as a Basic Service and are limited to once in a 24-month period.
